

ECT to exhibit at the MWC Barcelona 2019, showcasing its Next-Gen VAS Solutions, Groundbreaking Telecom Innovations and its unique Joint Agile Product Development Program

The largest mobile and telecom event in the world will serve as a backdrop for ECT to present its one-of-a-kind products and services to some of the biggest carriers and MSPs worldwide.

Munich, February 6, 2019 — [ECT \(European Computer Telecoms AG\)](#), Europe's leading communications software company for the realization of value-added services in next-generation networks, will exhibit once again at the MWC Barcelona 2019, the largest mobile event in the world as well as conduct closed-doors meetings by appointment.

As part of the Bayern Pavilion, ECT's booth (Fira Gran Vía, Hall 8.1, Stand 8.1|59) will be open to all attendees and display live demos of new products throughout the four days of the event (February 25th-28th). These include Fuse, a powerful device-agnostic [OTT multimedia telephony solution](#); and Shik, a team collaboration and unified communications service.

Visitors will also have the opportunity to discuss a myriad of topics with ECT's experts, such as WebRTC, [Network Function Virtualization](#), [migrations from legacy platforms to IMS and VoLTE](#), and [Service Delivery Platforms](#).

ECT is also scheduling meetings with prospective and current customers to further explore the benefits the company's solutions and, in particular, the [ECT Joint Agile Product Development](#).

If you need additional information regarding ECT and would like to set up a meeting with our experts during the event or later, please [contact us](#) and we will get back to you shortly.

About ECT (European Computer Telecoms AG):

ECT is Europe's leading communications software company. With our virtualized *INtelliECT*[®] **Service Delivery Platform**, innovative service applications and our Joint Agile Product Development Program, major communications service providers worldwide realize their products with minimal costs and the shortest possible time-to-market. We also often migrate existing services from multiple legacy platforms, innovating and consolidating them in one multiservice solution. As a one-shop vendor, we cover not only core services, like carrier routing, NP and FMU, but also sophisticated cloud services, e.g. for call centers and unified communications as a service (CCaaS and UCaaS as well as workstream collaboration). Our Innovation Department keeps our software development – and thus the products of our customers – on the cutting edge of communications technology. We empower BT, Deutsche Telekom, DNA, Hi3G, izzi, KCOM, Liberty Global, Proximus, TalkTalk, Teliasonera, Virgin Media, Videocon, VodafoneZiggo, among many others. In addition to our own direct sales and service primarily in Europe, we also partner with Nokia worldwide. Together with our customers and partner, we at ECT enjoy meeting challenges and creating opportunities.

Founded in 1998, ECT is an unlisted German public company with its headquarters in Munich, Germany and wholly owned sales and service subsidiaries in the United Kingdom, The Netherlands and the USA.
