

ECT is a tech company dedicated to better business outcomes for communications service providers (CSPs) and their customers. With our Telecoms Low-Code Application Platform (T-LCAP), Packaged Business Capabilities (PBCs), ready-to-use apps and agile co-development, we enable CSPs to compose, enhance and individualize telecoms services and products implemented within their telecoms network. Our parent company, the European Computer Telecoms AG, is a German public company located in Munich, Germany, where we employ engineering experts from over 30 countries. The language of our company is English. German is not required.

We are currently hiring

**Technical Product Owner, Telecoms Low Code (m/f/d)
Working in Munich, Germany**

This is a major opportunity for an ambitious software engineer, solution architect or product owner in the area of low-code development platforms. We are building a powerhouse within the ECT Group to unlock the full potential of our telecoms low code, making a major contribution to business outcomes for CSPs. The T-LCAP is utilized internally at ECT and externally by CSPs for the composition and continuous enhancement of telecoms products and services. You serve as the voice of these two user groups to guide development teams in building software capabilities with the highest business and customer impact. You recognize business needs, prioritize and manage the T-LCAP backlog, and incorporate feedback from internal and external stakeholders to guide continuous improvement. You develop roadmaps with continuous value increments, expanding our low-code and no-code capabilities as required for the composition of telecoms products and services.

Responsibilities

- Guide all stages of software development, including user story development, sprint planning, and prioritization of the product backlog.
- Understand business and end-user needs; identify and prioritize features to be delivered to meet those needs.
- Work with business and technical stakeholders to develop and document user stories.
- Participate in sprint planning to determine the team's objectives for the upcoming sprint.
- Prioritize and maintain the product backlog.
- Participate in stand-ups, story refinements, and team retrospectives; ensure the agile squads has a clear understanding of priorities and next steps.
- Lead the sprint review meeting to present the output from the sprint to key stakeholders.
- Analyze feedback from sprint reviews, and other data such as end user feedback and operational metrics, to identify and understand product needs.
- Work with the development team to create acceptance criteria and definitions of failures and done.

- Assist the squads on the development of feature tests, test cases, and regression tests.
- Set expectations with business stakeholders for delivery of new capabilities, features, and functionalities.
- Elaborate and implement product roadmaps based on your analyses of the business and technological issues clients are currently facing
- Inspire all squad participants with your vision and leadership, ensuring predictability, performance and a steady delivery velocity
- Be on top of things by driving risks identification and mitigation plans

Skills and Competencies

- Ability to understand complex business problems and identify and interpret business needs.
- Advanced knowledge of agile development methodologies.
- Demonstrated facilitation and influencing skills to drive decision making among stakeholders with diverse perspectives and priorities.
- Demonstrated ability to communicate complex technical information in a condensed manner to various stakeholders verbally and in writing.
- Strong problem solving and analytical skills.
- Knowledge of agile planning tools (e.g. JIRA, Confluence) preferred.

Qualifications

- **5+ years in the development and/or product management of low-code development platforms**
- Comprehensive knowledge of agile software development with tech foundation in low code, TypeScript, data modelling and UX design
- A real hands-on team leader with excellent written and oral communication skills, inspiring all members in your agile teams with your vision
- Product owner certifications (e.g. Certified Scrum Product Owner, SAFe Product Owner Certification) a plus.

Who we are:

- **We have an amazing, highly diverse team** with colleagues from Brazil, Bulgaria, Colombia, Egypt, Finland, France, Germany, Guatemala, Greece, Hungary, India, Indonesia, Iran, Ireland, Mexico, the Netherlands, Pakistan, Peru, Romania, South Korea, Spain, Tunisia, Turkey, the USA, etc.
- **We care about you.** All employees participate in the success of our company via our company bonus. We offer a highly competitive compensation package with an initial annual salary of 142,650 – 160,550 EUR (ca. 77% fixed and 23% variable), relocation assistance, free breakfast and lunch, and 30 workdays of paid vacation
- **We invest in your future.** We encourage all employees to participate in further education and offer in-house language courses and trainings, external seminars and university courses. Many colleagues have even completed company-sponsored MBA programs.

- **We care about our community.** For over 15 years, we have been the main sponsor of the Munich Chamber Orchestra and all employees receive tickets to their amazing concerts.

Please send your CV by e-mail, including your salary expectation and a possible start date to careers@ect-telecoms.de mentioning "Low Code" in the subject.

In order for your application to be considered, you must include a 2-minute video, in which you:

- 1. Introduce yourself and your qualifications for this position,**
- 2. Explain what motivates you to apply, and**
- 3. Ask three questions about the position and/or ECT.**

Employment starting date: immediate.
